Summary

Aspiring Python Programmer | Building Creative Websites

I'm a self-motivated web developer honing my skills in full-stack development, Python programming, and graphic design. While I'm new to the professional world, I've been actively building personal and client websites to solidify my knowledge and explore my creativity.

I'm particularly passionate about Python programming and have a strong desire to become a skilled and professional developer in this field. Through my freelance projects, I've gained valuable experience in bringing ideas to life online. For instance, I developed "PQ @ DELSU", a full-stack web application -where students can access study materials in PDF format- using Python's Django framework and db.sqlite3 database link-[<https://app.coursearena.com.ng>]. I also built a GPA Calculator, a data analysis tool using Python libraries like Pandas and Matplotlib. In addition to development, I used my graphic design skills to create a user-friendly interface for my own personal portfolio website link-[<https://brabdnova.github.io>].

Feel free to connect with me to discuss web development, Python, or exciting new projects!

Education

Delta State University, Nigeria

Bachelor of Engineering, Electrical and Electronics Engineering · (2021 - 2025)
